

COMPRESSORS EKOM

PLUS, PLUS 2V stabil - silent optimum variant

Oil-less compressors EKOM of the line PLUS a PLUS-2V are the source of clean, pressed, oil-free air designed for driving of dental appliances and equipment. With regard to their parameters and capacity of the air tank of 25 litres are suitable for supplying of one - variant PLUS, of two dental units - variant PLUS 2V or devices in dental laboratories. Air produced by oil-free compressors provides a higher degree of hygiene and quality of work of the dentist and does not pollute the working environment by heterogeneous substances.

Compressors are produced in following variants:

Stabil with fixed base for individual installation in arbitrary space

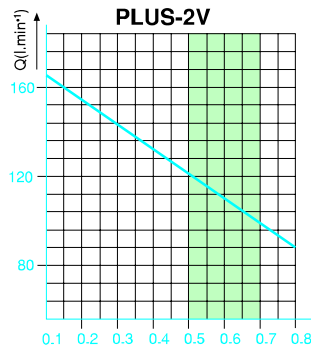

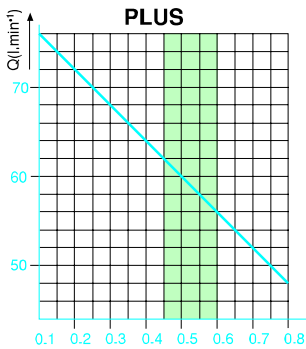

Silent in cabinets with effective reduction of noise and by its design are suitable for placing in surgeries as an integral part of the dental furnishings.

The variants Stabil may work in continuous operation, the variants Silent in cabinets in intermittent operation.

It is possible to use these devices also in other areas of medical services, and in every condition where its features meet the requirements.

All of these compressors can be completed according to customer's wish, with the next equipment for the arrangement of air as:

filtration condensing unit dryer
